

Print Ready Files

File Requirements

Program Used to Create File	Method	Desired Format*
Adobe Illustrator	Save As Save As Save As Export as Export as	.eps .ai .pdf .jpg – high resolution .tif
Adobe Photoshop	Save As Save As Save As	.jpg – high resolution (flattened) .psd (flattened) – version 7 or previous .tif (flattened)
Corel Draw	Export as Save As Save As Export as	.eps .ai – version CS or previous .cdr – version 11 or previous .jpg – high resolution
Adobe InDesign	Export as Export as Export as Save As	.eps .pdf .jpg – high resolution .indd – version CS or previous
Adobe Acrobat Professional	Save As	.pdf

*Desired formats are listed in order of preference. Please supply files in alternate formats only if they are too large to email or to fit on a disc in the desired form. Please note: we cannot print directly from .cdr, .ai or .indd formats. Allpride Signs + Marketing will have to convert such files to other formats before printing, incurring an artwork fee of \$60 per hour.

Colour

Please supply files in CMYK colour mode. Allpride Signs + Marketing are not responsible for colour discrepancies in prints created elsewhere. Please note: Pantone colours are only 80-85% accurate.

Size

The image/file must be supplied in the desired printed size. You will be charged an artwork fee (\$60/hour) for Allpride to resize the image. Exception: images created entirely in vector format (i.e. containing no photographic parts) can be printed to size without reworking files. Please add any necessary bleed to files before supplying them to Allpride. Crop marks or crop outlines can be added at printing if requested.

Quantity/Layout

Please supply all images in separate files. Please do not duplicate images in the same file if multiple copies are required. The printer will lay out the images to fit media appropriately – grouping them and rotating them as needed to save space.

Please provide Allpride with print requirements in writing along with all files.
